INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

Box	No. I	Basis of the report					
1.	 With regard to the language, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item. 						
	This report is based on a translation from the original language into the following language which is the language of a translation furnished for the purposes of:						
		international search (under Rules 12.3 and 23.1(b))	į				
		publication of the international application (under Rule 12.4)					
	international preliminary examination (under Rules 55.2 and/or 55.3)						
2.	With regard to the elements of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):						
		the international application as originally filed/furnished					
	\boxtimes	the description:					
		0426	originally filed/furnished				
		pages* 1-21 received by this Authority on 17.08 pages* received by this Authority on	.2004				
	←						
	\bowtie	the claims:	originally filed/furnished				
		pages* as amended (together with any s pages* 22-28 received by this Authority on 16.08	.2004				
		pages* received by this Authority on					
	∇	the drawings:					
		pages 1-10 as	originally filed/furnished				
l		pages* received by this Authority on					
		pages* received by this Authority on					
		a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Li	sting.				
3.		The amendments have resulted in the cancellation of:					
		the description, pages					
		the claims, Nos.					
		the drawings, sheets/figs	· ·				
ĺ		the sequence listing (specify):					
		any table(s) related to the sequence listing (specify):					
4.		This report has been established as if (some of) the amendments annexed to this report an made, since they have been considered to go beyond the disclosure as filed, as indicated in 70.2(c)).	d listed below had not been the Supplemental Box (Rule				
		the description, pages					
		the claims, Nos.					
1		the drawings, sheets/figs					
		the sequence listing (specify):					
		any table(s) related to the sequence listing (specify):					
*	* If item 4 applies, some or all of those sheets may be marked "superseded."

Cited documents:

1. D1: EP 1154110 A2 2. D2: US 5027552 A 3. D3: EP 0191137 A2

The invention relates to a squeeze protecting device arranged to detect the presence of an object in a protection area of the kind stated in the preamble of claim 1.

Thee object of the invention is to provide a device that is able to simultaneously detect physical pressure of conductive as well as non-conductive object and persons or conductive objects within a protection or measurement field generated by an antenna. The detecting unit shall be protected from being affected by variations in temperature and moisture.

According to the invention, this is achieved by a squeeze protecting device comprising features as stated in the characterising part of the claim.

The invention also relates to methods as stated in claims 12 and 13, a contact rail as stated in claim 19 and systems as stated in claims 20 and 21.

From D1 is known a squeeze protecting device as stated in the preamble of claim 1. The known device can detect the presence of conductive as well as non-conductive objects but lacks balancing means for maintaining the generated electric or electromagnetic field at the antenna unit in a balanced condition and filter means preventing the detecting unit from being affected by variations in temperature and moisture.

PCT/SE2003/001421

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: \boldsymbol{V} .

None of the cited documents gives any indication towards the claimed squeeze protecting device. No relevant combination of the cited documents would lead a person skilled in the art to the invention defined in the claim.

This also applies to claims 12, 13, 19, 20 and 21.

Therefore, the inventions defined in claims 1-22 are novel and are considered to involve an inventive step. They are also considered to be industrially applicable.
